Surface
1 · Copy mesh/system/, meshInfo, edge files
2 · Write lBody, rBody and the options into meshDict
3 · Rename the solids: cone, walls, tail
4 · surfaceGenerateBoundingBox: add the domain faces
5 · surfaceFeatureEdges -angle 60 → geometry.fms
Volume
6 · cartesianMesh
7 · createPatch: inlet, outlet, box
Half mesh?
yes
7a · topoSet + subsetMesh: keep z ≥ 0
7b · snapPlane.py: z = 0 on the cut
7c · createPatch: symm; Aref/2 in meshInfo
no (--full)
8 · checkMesh
9 · Record in meshInfo
Negative volumes?
yes
Stop: do not use the mesh
no
