TeleMega CSV
Pad pressure p0: mean before launch
GPS height above the pad √(pad_range² − pad_dist²), descent
Fit T0 and lapse rate L: p = p0 (1 − L h/T0)^(g/RL)
Anchor at t = 18 s: dh/dt from the baro
Integrate dV/dt = a_x − g cos(tilt) forward and backward
Integrate the height
Ambient p and T from the height
Cd = −m a_x / (½ ρ V² Aref)
Check: apogee against the GPS
