Free-stream Mach number
M < 1
M > 1
rhoPimpleFoam
pressure-based, transonic
rhoPimpleFoam start run
on the coarsest mesh
p: freestreamPressure on inlet,
outlet, box
one acoustic wave enters
rhoCentralFoam
density-based, central-upwind
Start: uniform free stream,
then the coarser mesh
p: fixedValue inlet ·
zeroGradient outlet
waveTransmissive box
Start: pimple run on the same
mesh,
then the coarser central run
T0 changes cp?
no
yes
